Advanced power system high voltage test equipment and testing instruments

KV Grid Tester Co.,Ltd is a high- technology company combines research , production and commerce as one. We are professional manufacture of electric equipments (design and production). KV Grid Tester Co.,Ltd supplys advanced HV test equipments and detection instruments for electric system (power meter , high voltage tester , electrical testing) ,scientific research institution and manufactures related to electric equipments. Our products widely used in electric power, water conservancy, oil, railroad, mine and chemical industry etc.

The power of development comes from our steady innovative science strategy, the root of the innovation is excellent human resource. NDZC KV Grid Tester Co.,Ltd relys on Wuhan HV research institute, Huazhong University of Science and Technology, and Wuhan University, commits to research, production and sale for testing and measuring equipments of electric power, HV test equipment, substation testing system on-site and software related to this.

KV Grid Tester Co.,Ltd takes "Excellent quality, circumspect service, customer supreme ,integrity is essential" as our steady policy. We sincerely hope to cooperate with customers all over the world and make progress together.
